

DUAL POUR FUEL CANS

Made in Australia from a non corrosive material, the Impact-A 20ltr Fuel Cans, in both Petrol and Diesel, are the best portable fuel storage product in today's market.

Designed for convenience and comfort, this Fuel Can outperforms all of its competitors, especially when it comes to it's pouring volume.

The Dual Pour feature not only allows the user to pour from both ends of the can, but loosening the opposite pouring hole also increases the airflow into the container, allowing the fuel to freely flow out.

The Dual Pour action together with the vented funnel attachment, makes life a lot easier when it comes to refueling.

No longer do you need to have ironman arms to hold 20ltrs of fuel up in the air for a long period of time when refueling, as this Dual Pour design cuts down your pouring time dramatically.

Impact-A 20ltr Dual Pour Fuel cans, are made in Australia and are perfect for storing and refueling either Petrol or Diesel, making them the true Tradies Mate.

Key Features

- AS/NZS 2906 approved
- Flexible vented spout for accessing hard to reach areas
- Dual Pour for quick filling
- Accelerated flow by opening opposite cap
- Australian made
- 20ltr Pour fast
- Comes in a non corrosive container
- Comes in both petrol (red) and diesel (yellow)
