

9PCE LONG HEX KEY SET (TAMPER TORX)

This Impact-A 9 Piece Long Tamper Torx Hex Key Set includes nine hex keys of varying Tamper Proof sizes, typically used for tightening or loosening screws and bolts with Tamper Proof heads.

Made from heat-treated chrome alloy steel, the heat treatment improves the hardness and strength of the steel, making the keys durable and able to withstand high torque applications.

The hex keys are organised and securely held in plastic holders, keeping the keys organised and prevents them from getting misplaced.

The plastic holders are designed so they can be opened horizontally. This feature allows for easy access to each hex key, making it convenient to select the right size. It also facilitates replacement of individual keys if needed.

Overall, this 9-Piece Long Tamper Torx Hex Key Set is designed for durability, ease of use, and organisation, making it a practical choice for any type of user, where precision and reliability are essential.

The Long Hex Key Set offers the perfect combination of strength, convenience, and versatility. With its heat-treated chrome alloy steel construction, secure plastic holders, and extended length for accessing tight spaces, this set is an essential addition to any toolbox or workshop.

Whether you're a professional technician or on the tools type tradesperson, these hex keys provide reliable performance and ease of use for a wide range of applications.

Key Features

- **Heat-Treated Chrome Alloy Steel Construction:** Provides exceptional strength and durability, ensuring long-lasting performance.
- **Secure Plastic Holders:** Safely store and organise hex keys, allowing for easy identification and access.
- **Horizontal Opening Design:** Facilitates effortless removal and replacement of keys, enhancing workflow efficiency.
- **Extended Length:** Allows for increased reach, making it easier to access confined spaces or difficult-to-reach areas.
